

Your child is now at a new stage where he or she will continue to grow and learn many new things. To give him or her the best chances at remaining healthy, the Québec vaccination program offers vaccines throughout early childhood. That program also continues during your child's school years.

In the weeks following the return to school, your CLSC nurse will check your child's vaccination record to make sure he or she has received all the vaccine doses recommended according to age: diphtheria, whooping cough, tetanus, poliomyelitis, measles, German measles, hepatitis A and B, mumps, haemophilus influenzae B, chickenpox and meningococcus.

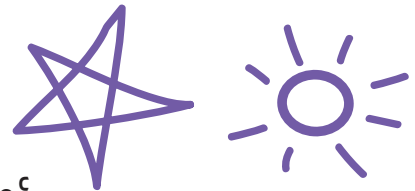

Vaccines will be offered to complete the age-appropriate vaccination of your child.

The CLSC will contact you to obtain your consent and schedule an appointment, or to inform you of the planned vaccination date.

Should you require further information, please contact your CLSC.

Thank you for your cooperation.
